

## Chief XL

This ambulance provides the optimum in room, storage, and comfort. Built on the Ford E-450, F-450 chassis, Chevy G-4500 or C-4500 chassis, you get a powerful vehicle with one of the highest usable payloads in the industry. The Chief XL boasts headroom height of 72" while taking advantage of the length to provide maximum storage both inside and out. Available in our standard package or customized to meet your specific requirements, the Chief XL provides value, comfort, and safety for both the patients and crew.

# Chief XL

### Glove Box Holder/Dispenser:

The Glove Box Holder/Dispenser mounted in the standard location above the side entry door provides easy, convenient storage and access to three different glove sizes. This popular feature can also be installed in custom locations such as above the rear entry doors or the lower right wall with a choice of one, two or three.

### Stair Chair Storage:

Exceptional storage and convenience... the custom Stair Chair Storage option provides a safe and secure storage location for every stair chair model. Utilizing the unused space of the interior of the compartment door, this "pocket" is specifically designed maximize compartment storage space.

Safety and convenience are the key advantages to the new EZ Glide™ sliding side entry door offered by Braun Industries, Inc. By sliding the door out of the way, snug up against the module, the door does not open into traffic, create blind spots, or restrict personnel from getting in or out of the module.

### Key advantages of the EZ Glide™ Door

- Door is not affected by wind or traffic created gusts.
- Provides easy in and out access.
- Strong welded track assembly is integrated into the module design for proven, reliable operation.
- Door slides wide open, out of the way.
- Easy to open and close, both inside and out.
