

**EMT**

The EMT (Emergency Medical Transport) model includes the popular GM Duramax diesel engine, roomier cab, and extra space under the hood, to make a Fleet manager's life easier. Popular premium items, which include a Multiplex Electrical System, a full Whelen Lighting Package, and Braun's exclusive EZ GLIDE SLIDING curbside door and much more, are all standard. With many interior and exterior storage compartments, a full 164" module length, and 68" of interior headroom, the EMT Chevy G-4500 is turning heads and impressing EMS crews, across the Country.

Wheelbase 159"

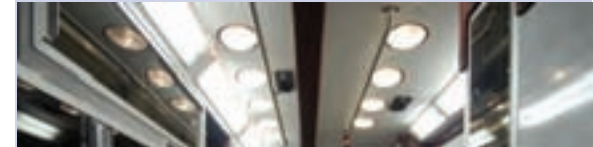

### Custom Graphics:

Our Graphics Department offers every customer the personal attention to detail and quality that is expected with every Braun Ambulance, providing the solution to all your graphics needs including creative design and professional installation of lettering, striping and digital printing. Pair that with our progressive warranty program and unbeatable customer service, that makes Braun Graphics the best choice for your custom graphics needs.

### Interior Headroom:

Consistent with SolidBody Construction, the arched roof design not only offers superior strength and stability, but provides increased interior headroom in all models. Braun pays particular attention to providing an unobstructed work area by recessing the ceiling mounted IV hooks and dome lights and installing the stainless steel grab rails in friendly locations. Optional Antimicrobial grab rails and assist handles are available to further protect all patients and crew members.

## VITALMAX LIGHTING SYSTEM

The VitalMax™ lighting system incorporated into every Braun Ambulance offers a shadowless light to aid patient care. A combination of intensity adjustable dome lights and angled fluorescents offer the highest lumen output in the industry, but still allows light levels to be controlled by the paramedics.

**VitalMax™ Lighting System... seeing is believing!**
