**Real
Advantages!**

BRAUN

At Braun, we are always looking for ways to improve the fit, function and quality of the features and options we offer. And not just for show, but for real advantage. Our newest innovation is our ultra-durable floating door latches.

New "Floating" Door Latch
Reduces the chance of
breaking or bending door
latch mechanisms.

Combined with
Braun SealTite
Doors, these are
the best built
storage and entry
doors in the
industry !!

Storage and entry door latches take a beating on ambulances. At the scene, storage doors are yanked open and slammed closed frequently. The latch and handle mechanisms take the brunt of the force. Traditional handles are connected to tie rods and the latch whether locked or unlocked. Our new design, disengages the tie rod from the handle when the door is locked, allowing the mechanism to "float free", reducing the chance of bending or breaking the handle or tie rods, especially when pulling on a locked door handle. And the deep pocket and beefy handle make it easier to grip, even when wearing gloves.
